## DXpedition News

**Libya** - 5A Bert 5A0A leaves Libya at the end of June; don't miss him. See I383 for operating details.

**Africa** WA9INK plans to hit several African spots over the next few weeks, including Mali TZ, Gineau-Bissau J5, and Niger 5U. He'll try to get on the air as job responsibilities and licensing arrangements permit. He's been reported from Ivory Coast as TU4CN on 21021 at 1400Z. Speaking of J5, Eric SM0AGD is not there; the J5HTL reports were not him.

**WPX Stations** LY7L celebrates the 117th anniversary of the birth of Lenin. FV6PAX will be active from Normandy May 24-June 30, for the 43rd anniversary of D Day.

**Rare Oblasts** Many of the harder-to-work Russian Oblasts have been active during the past few weeks, and the CQ-M (Peace) contest May 9-10 will bring out still more. DXpeditions to EV7DN, Oblast 002, and UD3KWZ, Oblast 003 should be on now through May 11. QSL the latter via UD7DWZ.

**Tonga** - A3 A35PP meets KF5E Saturdays at 2300Z on 21230.

**Ascension Island** - ZD8 ZD8CW wraps up his stint on (AF-03) next week, and will return to England and his home call, G3ZDW. He is the only ZD8 on 40 meters.

**Belize** - V3 WA5FLG expects to be on soon from Belize, including 30 meters.

**Panama** - HP May 16-17 marks the Panamanian Field Day, and special HP0 and HP31 prefixes will be active.

**Senegal** - 6W VE3JPC will operate RTTY, Packet and AMTOR from Senegal May 16-June 6.

And in the no-show category, we haven't received any reports of the VU4NRO Nicobar operation yet, nor FR5ZU/T. The VU4 license is good until May 20, and landing permission is in hand, but finances may be holding things up. Keep an ear out.

## Shortly Noted

• **West Malaysia** - 9M2 9M2s CW AX FS and HF have been reported by West Coast stations on 20 meter SSB (CW, HF) and CW (AX, FS), especially 14-1600Z

• **Oman** - A4 At one point on May 1, two A4 stations were on 20 SSB at the same time! A4XJT, A4XKB, and A4XKC have been workable from the US 03-0400Z.

• **Pakistan** - AP AP2s SQ and MQ have been putting good signals into all areas of the US on 20 SSB, especially 01-0400Z, but also at other times.

• **Christmas Is.** - T32 Joe T32BF has been very active from (OC-24), on 20 SSB 01-0400Z, and even on the 10 meter Novice band. QSL KH6GDR.

## RTTY From Johnston Island

Joe KL7LF/KH3 would like to get on RTTY, but has a problem with his C-64, and his present equipment isn't suitable for continuous duty. He needs donations to help ship his TS-940S to Johnston. Contact his QSL manager KL7VZ.

## Propagation Watch

The bands continue to produce excellent long-haul DX, with 20 meter openings extending far past sunset. 15 and even 10 meters have been providing some occasional excitement, and are probably open far more than reports suggest. DXers tend to ignore the higher bands at this time in the sunspot cycle, and even high solar flux figures don't provide the crowds on 10/15.

Will we get a recurrence of the super conditions we had in April, when that part of the sun rotates around this week? We probably won't see flux into three figures again, but odds are that we'll have some Above Average conditions this week. The CQ-M contest should be a fine opportunity to work rare Russian republics and oblasts, as well as lots of other goodies. May 13-14 looks like another good time to call in sick and stay home to work DX.

Meanwhile, enjoy the blip in solar flux, which has been accompanied by very low absorption: a DXer's dream! These conditions aren't likely to continue next month, so make the best use of the fine propagation now!
